Mary:

Thanks for the note.

I'd like to make oral remarks based on this attachment if that is possible and you feel it would be useful.

I've requested that our pharmacy residents gather some data - to identify what % of products have or don't have bar code labeling. My thought was to look at the high volume products - it would help explain how large the issue is.

I understand you have had a large number of people express an interest in the topic. If you have duplication I understand.

Kindest regards,
Daniel Ashby

Are you making oral remarks based on this attachment? Or does this serve as
a written comment?

Mary
